

## Introducing WesTest USAF F-15 Pitch and Roll Channel Assembly (PRCA)

WesTest designed and delivered 12 Pitch and Roll Control Assembly (PRCA) Test Consoles to the PRCA shop at Hill AFB. The PRCA Test Console was designed to combine three test consoles; Pitch Trim Console, General Purpose Console and the Auxiliary Test Console into a single PRCA Test Console.

In addition to the PRCA Test Consoles, seventeen TPS's were designed and developed to provide for testing and repair of the F-15 PRCA assemblies and sub-assemblies. WesTest successfully completed TPS integration and 1<sup>st</sup> article testing per USAF government requirements.

WesTest F-15 PRCA

WesTest has extensive experience in developing TPS's, conducting PDRs and CDRs and generating government approved Acceptance Test Plans, Acceptance Test Procedures and Acceptance Test Reports. WesTest has performed hundreds of TPS sell-offs including Verification and Validation Tests for the USAF government and commercial customers according to an approved ATP or as defined by unique customer requirements.
